OnCommand

OnCommand™ Connection is the industry's first and only open architecture remote diagnostic system for fleets of all makes and models of vehicles. Use OnCommand™ Connection to proactively identify potential problems, improve vehicle uptime, control maintenance and lower repair costs.

Features & Benefits

- Reduce** en-route events by proactively scheduling maintenance and repair
- Map** tools that plot truck locations, nearest dealers, hotels and local towing providers
- Generate** real-time comprehensive vehicle health reports
- Understand** fault codes quickly and easily with descriptions in plain English
- Gain** more insight with fault code action plans that provide severity information & recommend solutions

PARTS SPECIALS

Weldon Supplemental Warning Light

\$349.⁹⁸ ea.

Part #: W3200-00-11

The supplemental warning light provides districts with extra safety for children. The supplemental LED warning light is placed at bumper level on the bus to provide an attention demanding signal that is more perceptible to a distracted motorist than the standard 8 lamp system alone.
